ABOUT US

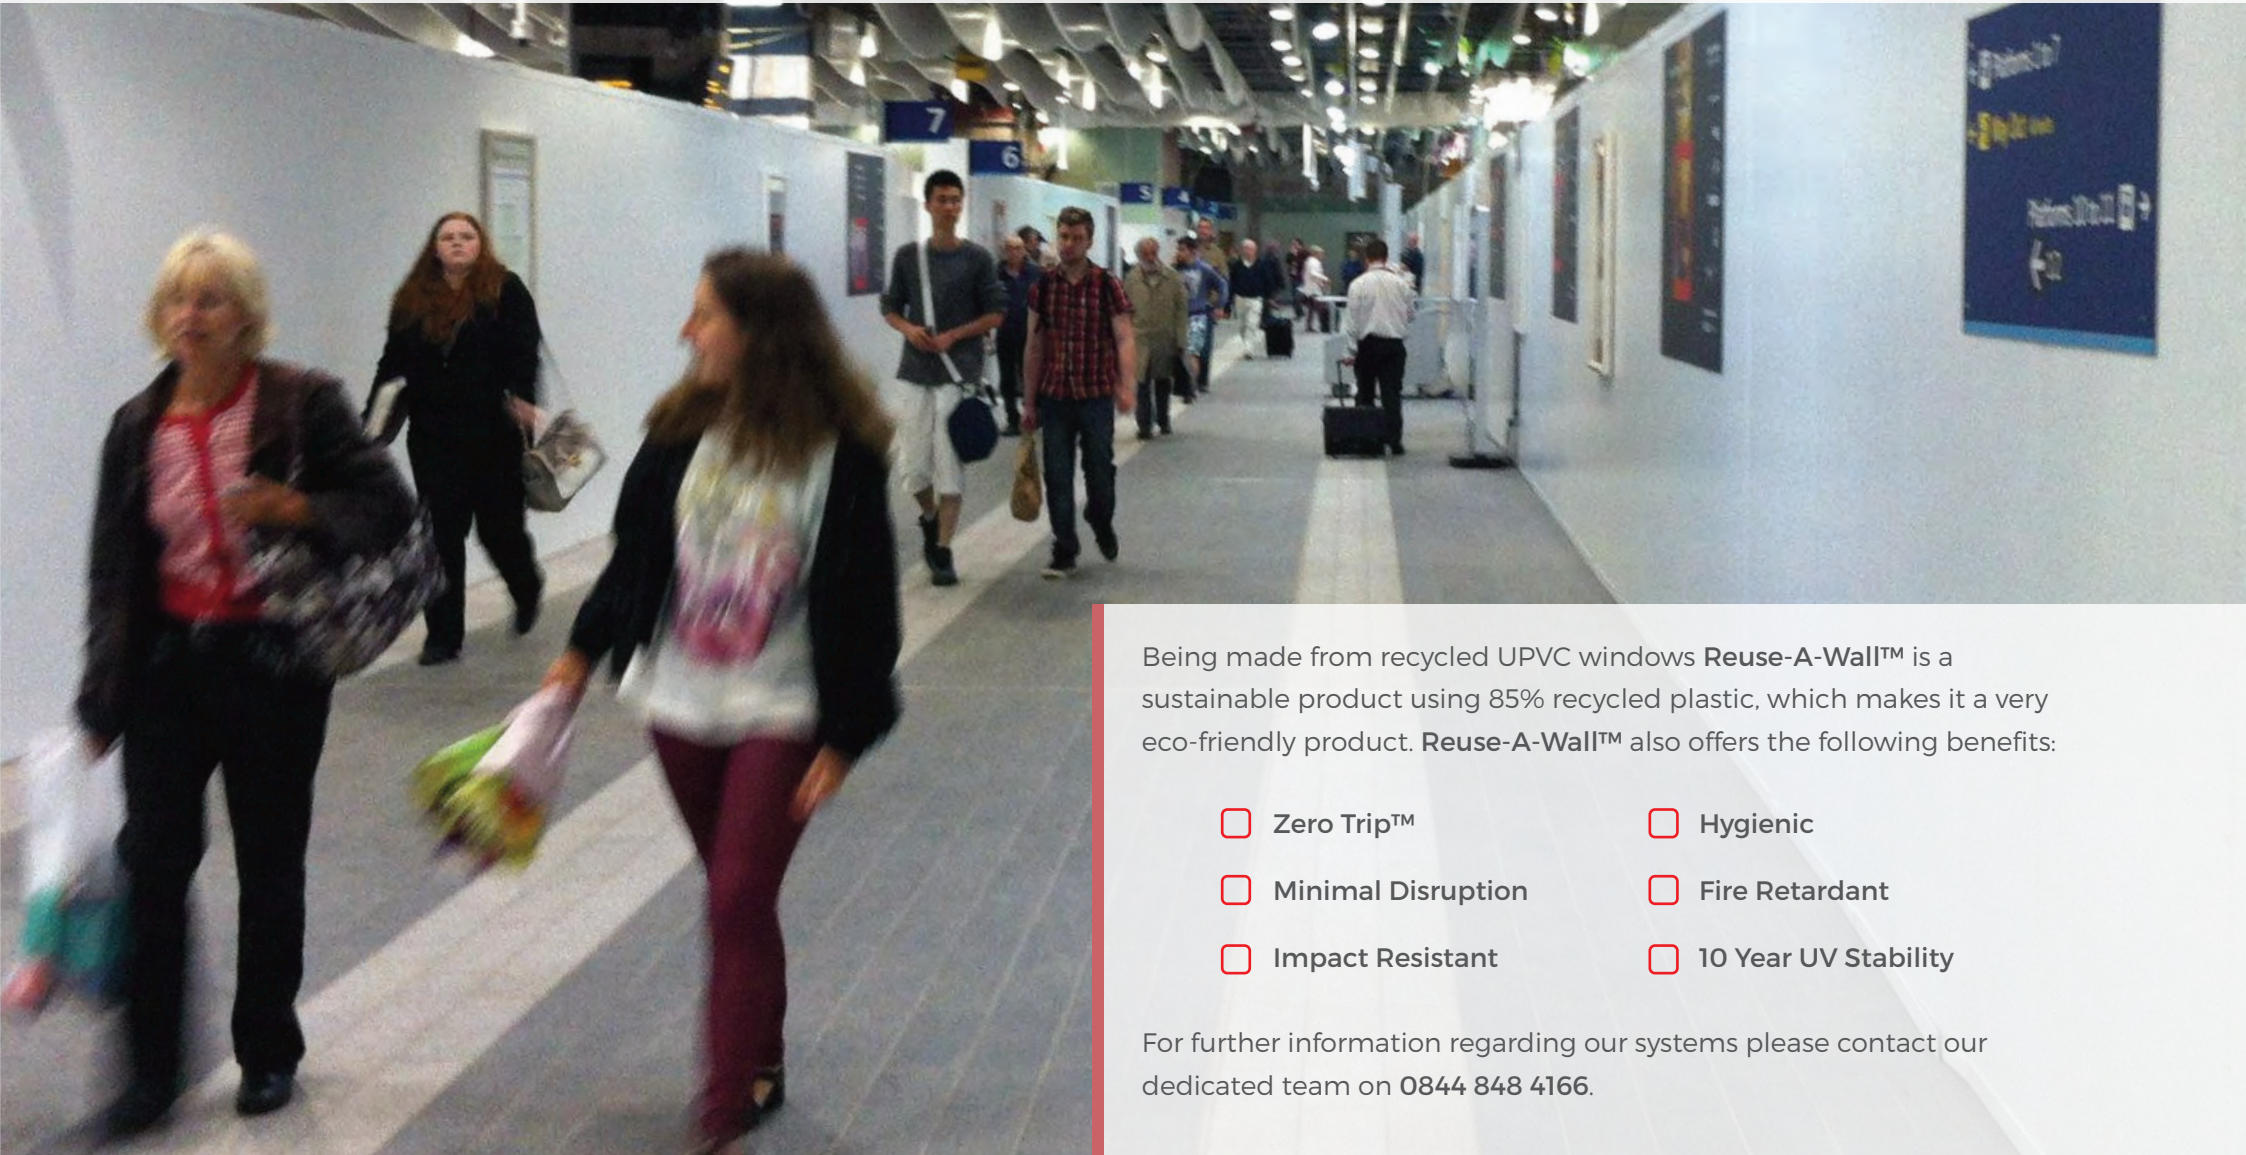

Reuse-A-Wall™ Internal Hoarding was developed to answer the needs of clients who were becoming more focused on sustainability and wished to reduce the amount of timber and plasterboard that was sent to land fill. With this in mind **Reuse-A-Wall™** came up with a product

that could replace temporary stud walls during a remodelling project with a system that is Zero Trip on the customer side, hygienic, allows point of sales advertising, requires little or no maintenance within the store and is fully recyclable.

Reuse-A-Wall™ hides building work and is easily adapted to become dust proof. With the aid of our acoustic blankets noise reduction of up to 75% can be achieved allowing building work to proceed during working or opening hours.

8 INTERNAL HOARDING SOLUTIONS

Being made from recycled UPVC windows **Reuse-A-Wall™** is a sustainable product using 85% recycled plastic, which makes it a very eco-friendly product. **Reuse-A-Wall™** also offers the following benefits:

- ☐ Zero Trip™
- ☐ Minimal Disruption
- ☐ Impact Resistant
- ☐ Hygienic
- ☐ Fire Retardant
- ☐ 10 Year UV Stability

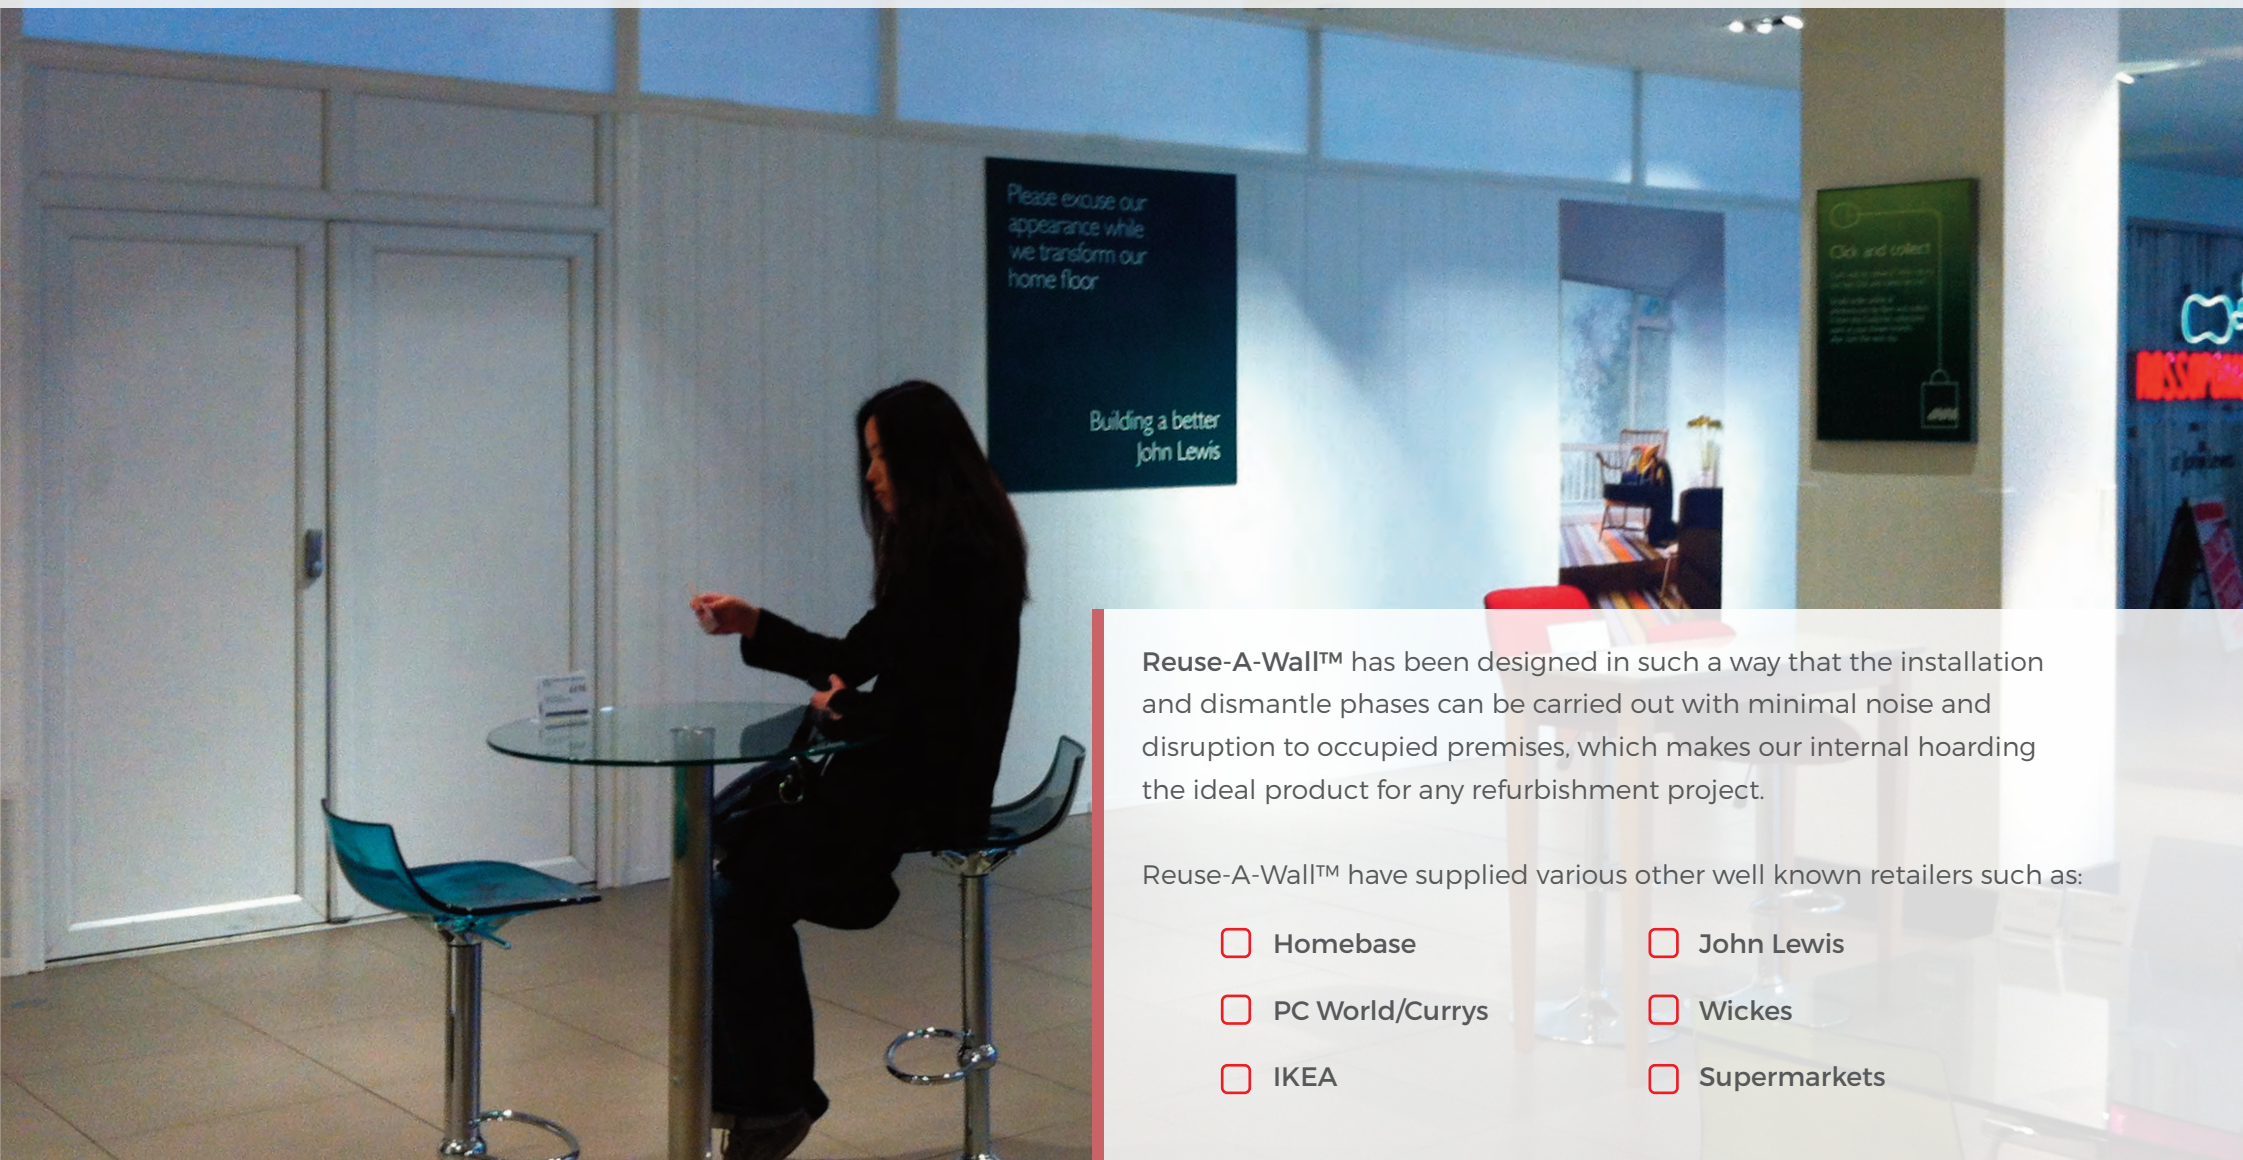

For further information regarding our systems please contact our dedicated team on 0844 848 4166.

INTERNAL HOARDING FOR RETAIL & SHOP-FITTING

Reuse-A-Wall™ has been installed in hundreds of the UK's best known supermarkets such as Sainsbury's, Asda, Tesco, Co-Op and Lidl. Our internal hoarding is a modular system so it provides unrivalled flexibility and strength. The panels are impact resistant designed to withstand collision damage from pedestrians trolleys. The system is easily cleaned, food safe and an anti-bacterial version is available to order.

RETAIL OUTLETS

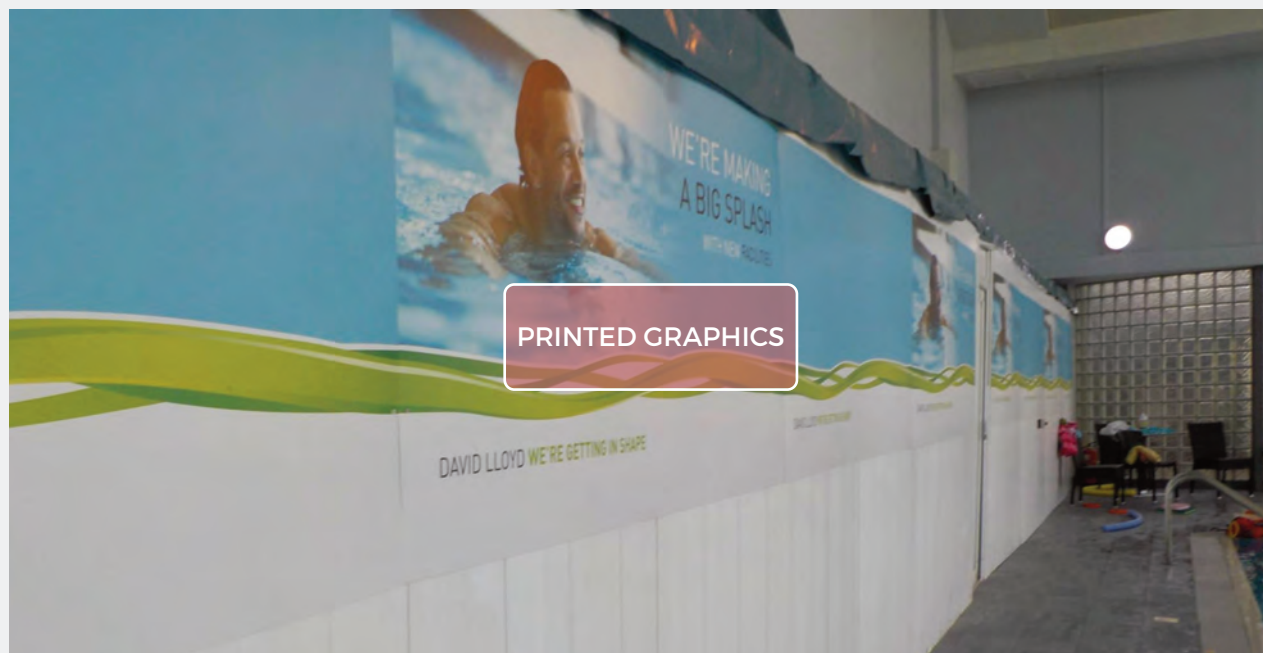

Reuse-A-Wall™ has been designed in such a way that the installation and dismantle phases can be carried out with minimal noise and disruption to occupied premises, which makes our internal hoarding the ideal product for any refurbishment project.

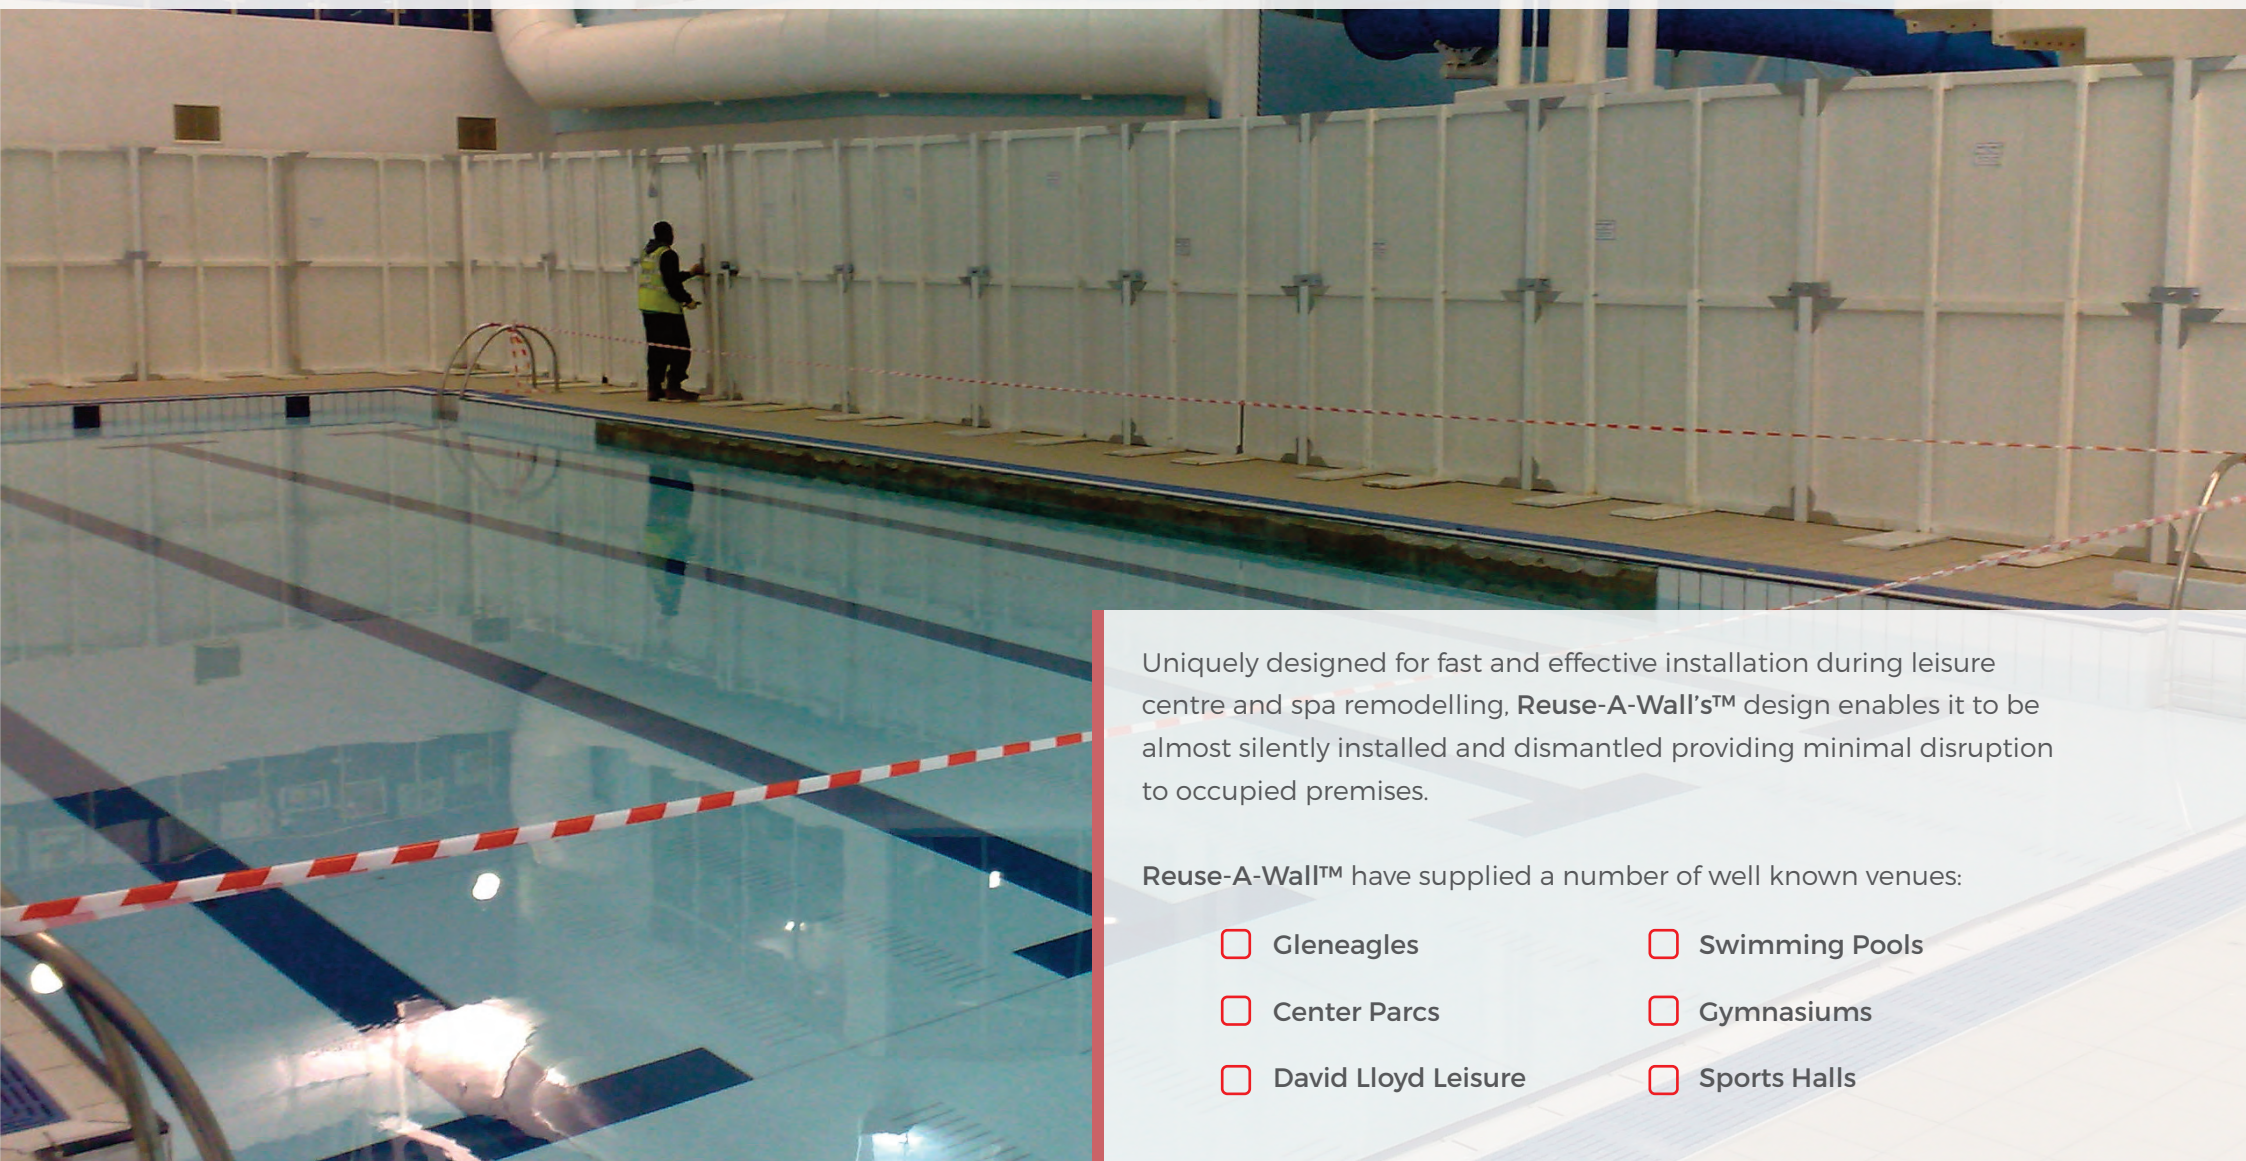

Reuse-A-Wall™ have supplied various other well known retailers such as:

- | | |
|--|---------------------------------------|
| <input type="checkbox"/> Homebase | <input type="checkbox"/> John Lewis |
| <input type="checkbox"/> PC World/Currys | <input type="checkbox"/> Wickes |
| <input type="checkbox"/> IKEA | <input type="checkbox"/> Supermarkets |

INTERNAL HOARDING FOR LEISURE CENTRES

Reuse-A-Wall™ is able to offer a completely free of charge design service for your hoarding graphics. The design is printed on **Reuse-A-Wall™** peel-on/peel-off graphic wallpaper. The basic system is installed from the surface and requires no working from height. **Reuse-A-Wall™** panels are fire retardant to class 1 and class 0.

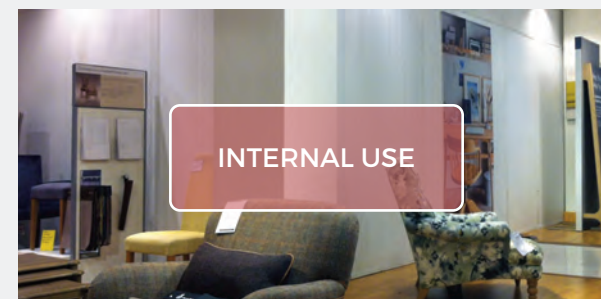

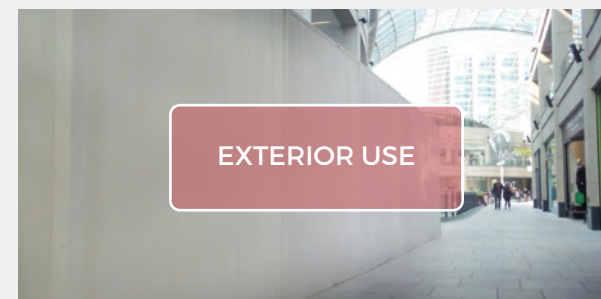

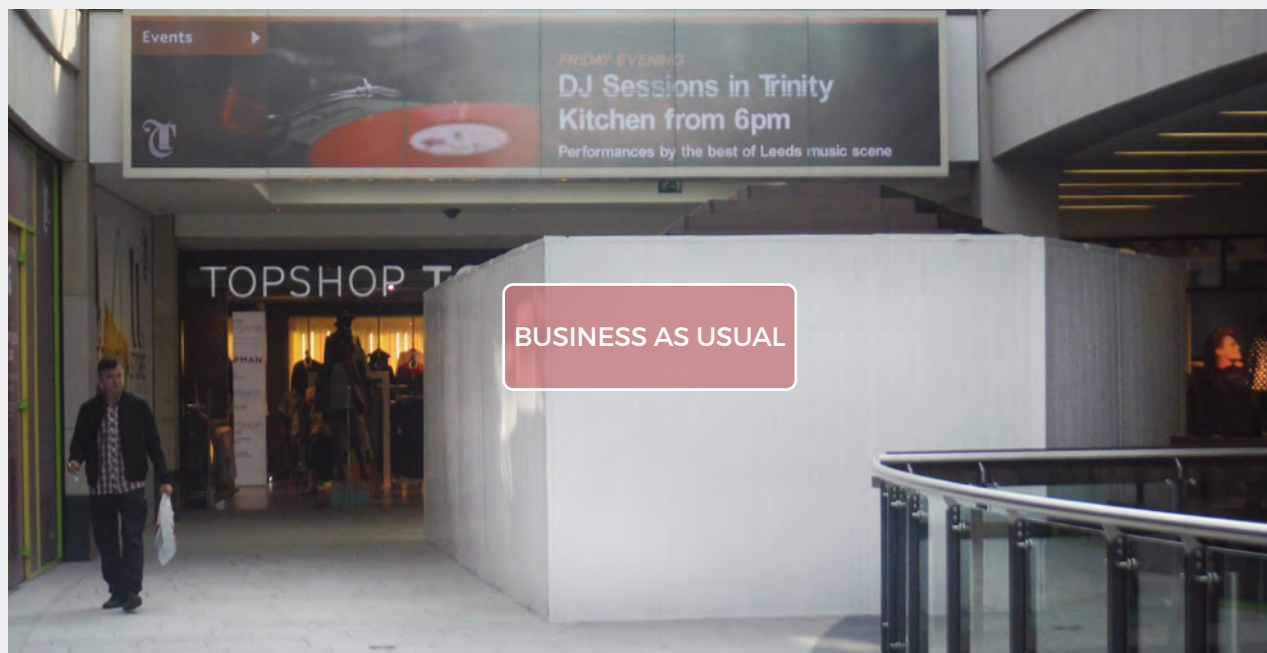

Uniquely designed for fast and effective installation during leisure centre and spa remodelling, **Reuse-A-Wall's™** design enables it to be almost silently installed and dismantled providing minimal disruption to occupied premises.

Reuse-A-Wall™ have supplied a number of well known venues:

- | | |
|--|---|
| <input type="checkbox"/> Gleneagles | <input type="checkbox"/> Swimming Pools |
| <input type="checkbox"/> Center Parcs | <input type="checkbox"/> Gymnasiums |
| <input type="checkbox"/> David Lloyd Leisure | <input type="checkbox"/> Sports Halls |

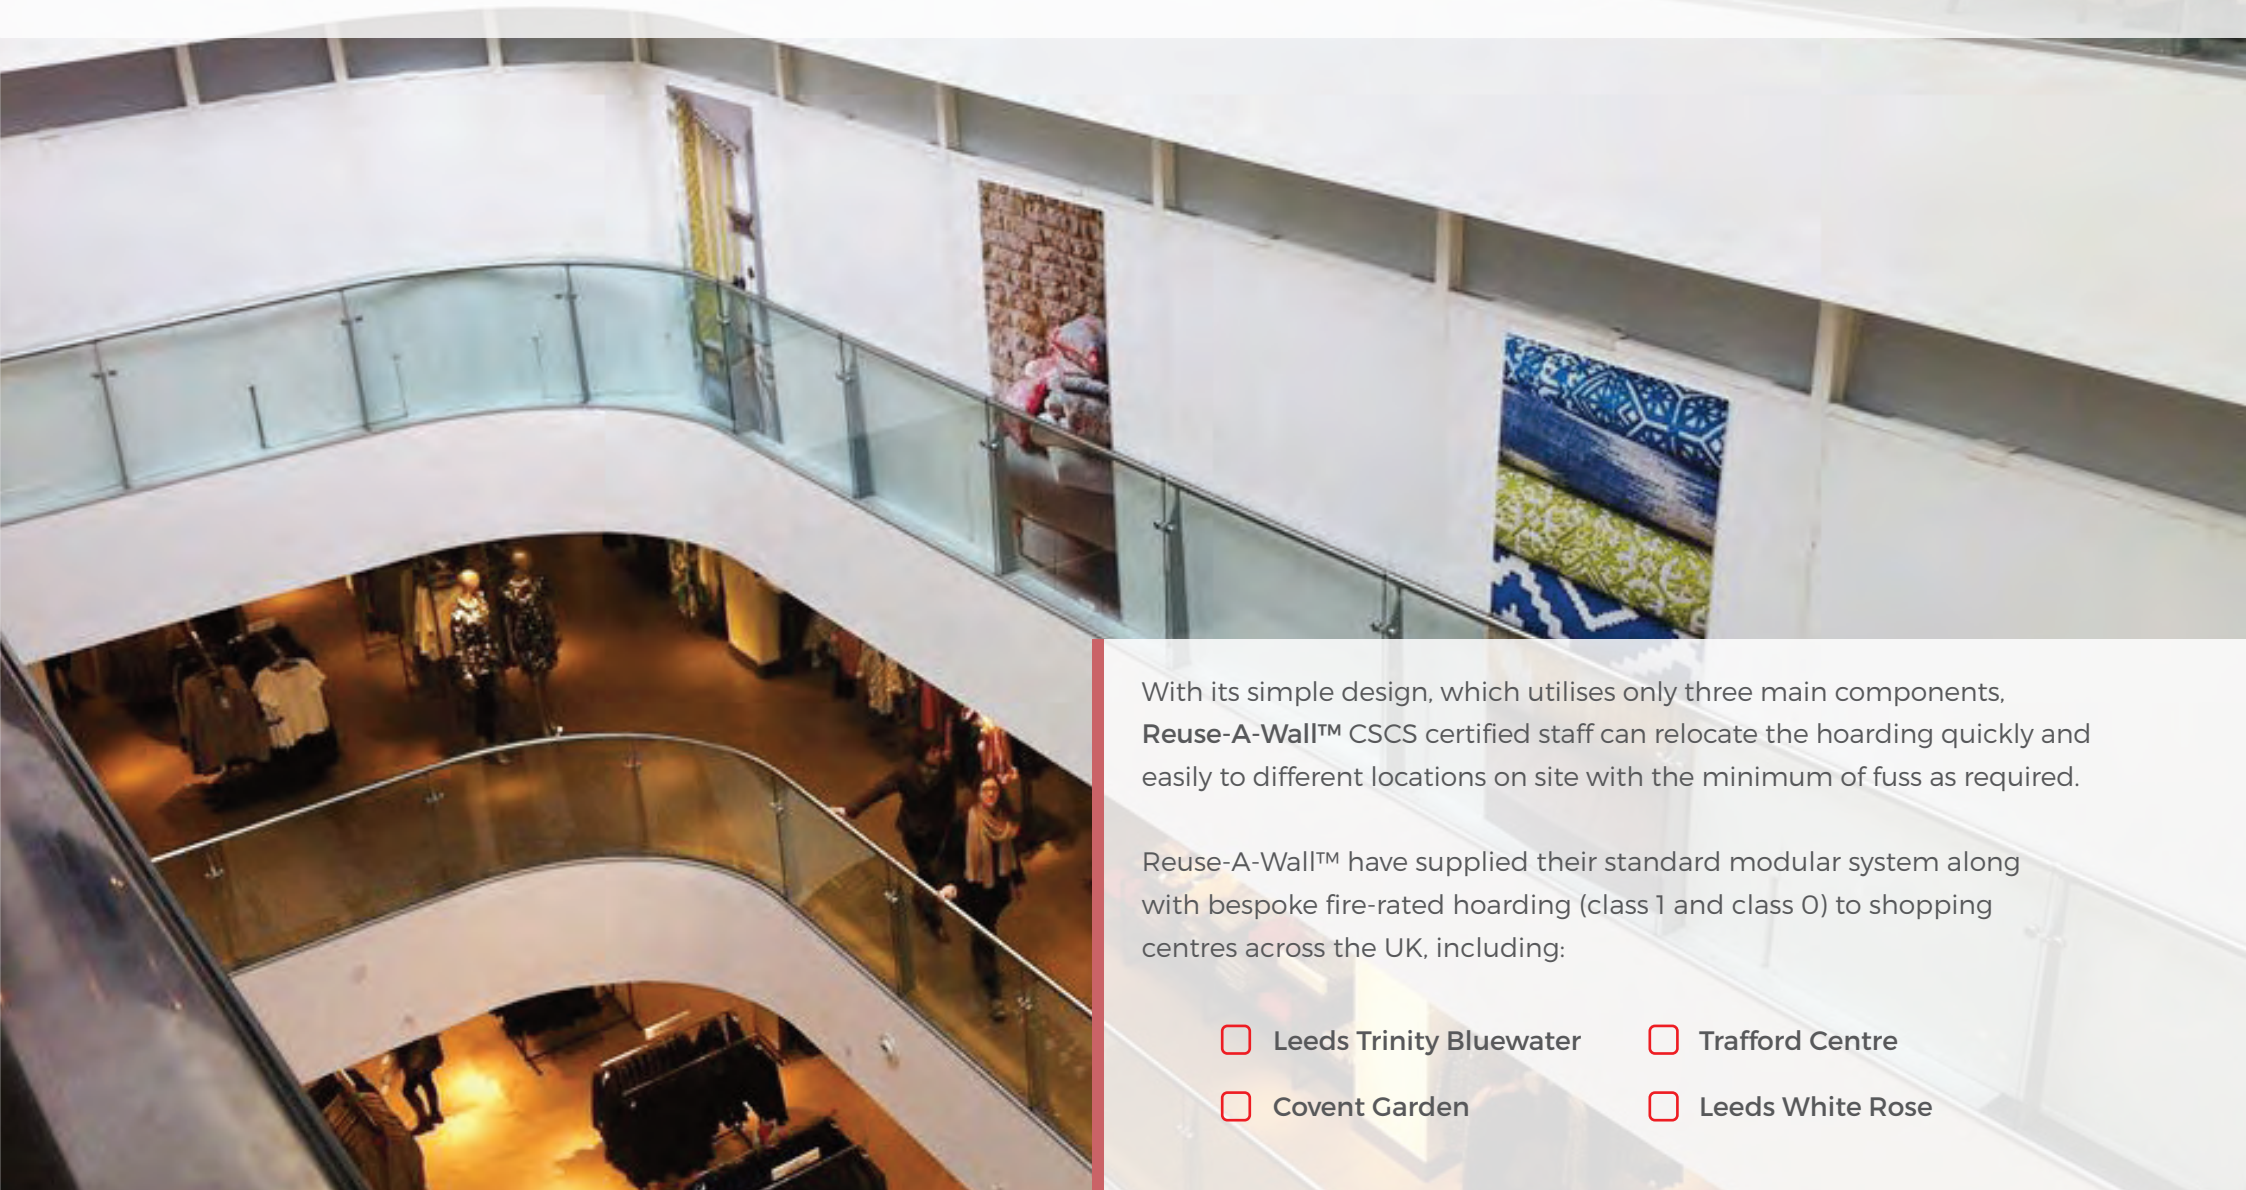

INTERNAL HOARDING FOR SHOPPING CENTRES AND MALLS

Designed to allow fast and effective placement of corporate marketing and branding, **Reuse-A-Wall™** is the perfect product for Shopping Centres as it creates the appearance of business as usual to the public, whilst providing advertising opportunities for businesses. Manufactured from specially designed PVC profile, although immensely strong the system is light and easy to handle.

SHOPPING CENTRES

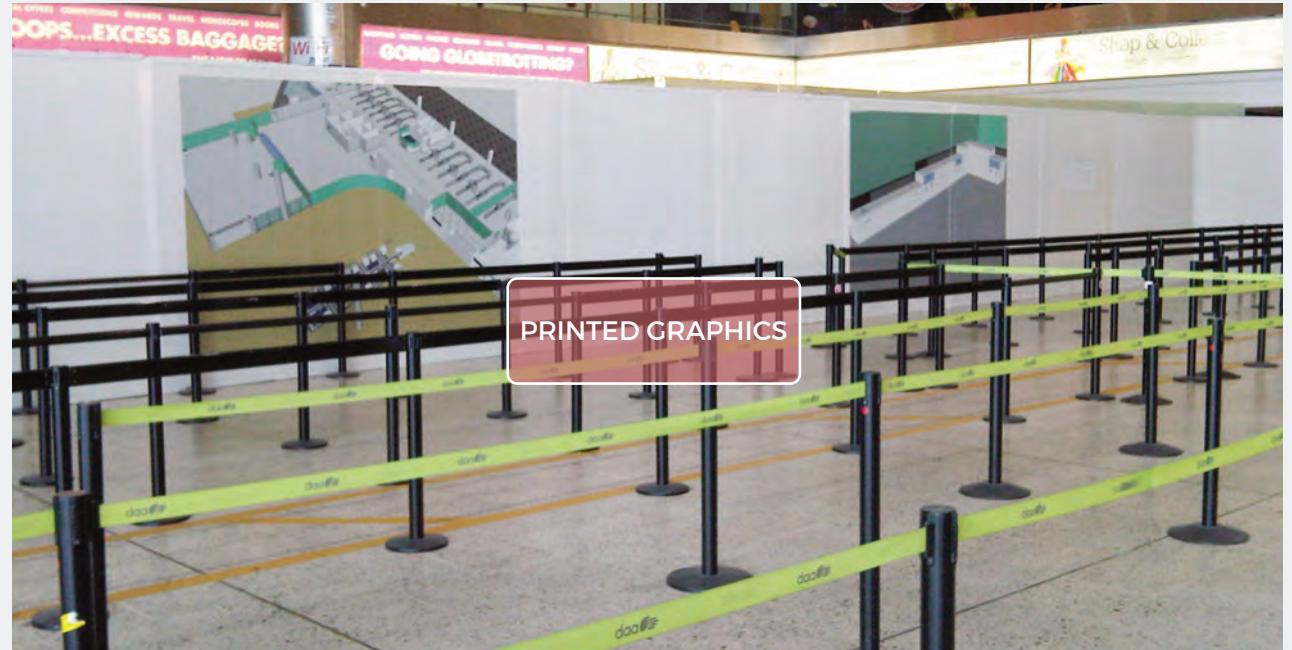

With its simple design, which utilises only three main components, **Reuse-A-Wall™** CSCS certified staff can relocate the hoarding quickly and easily to different locations on site with the minimum of fuss as required.

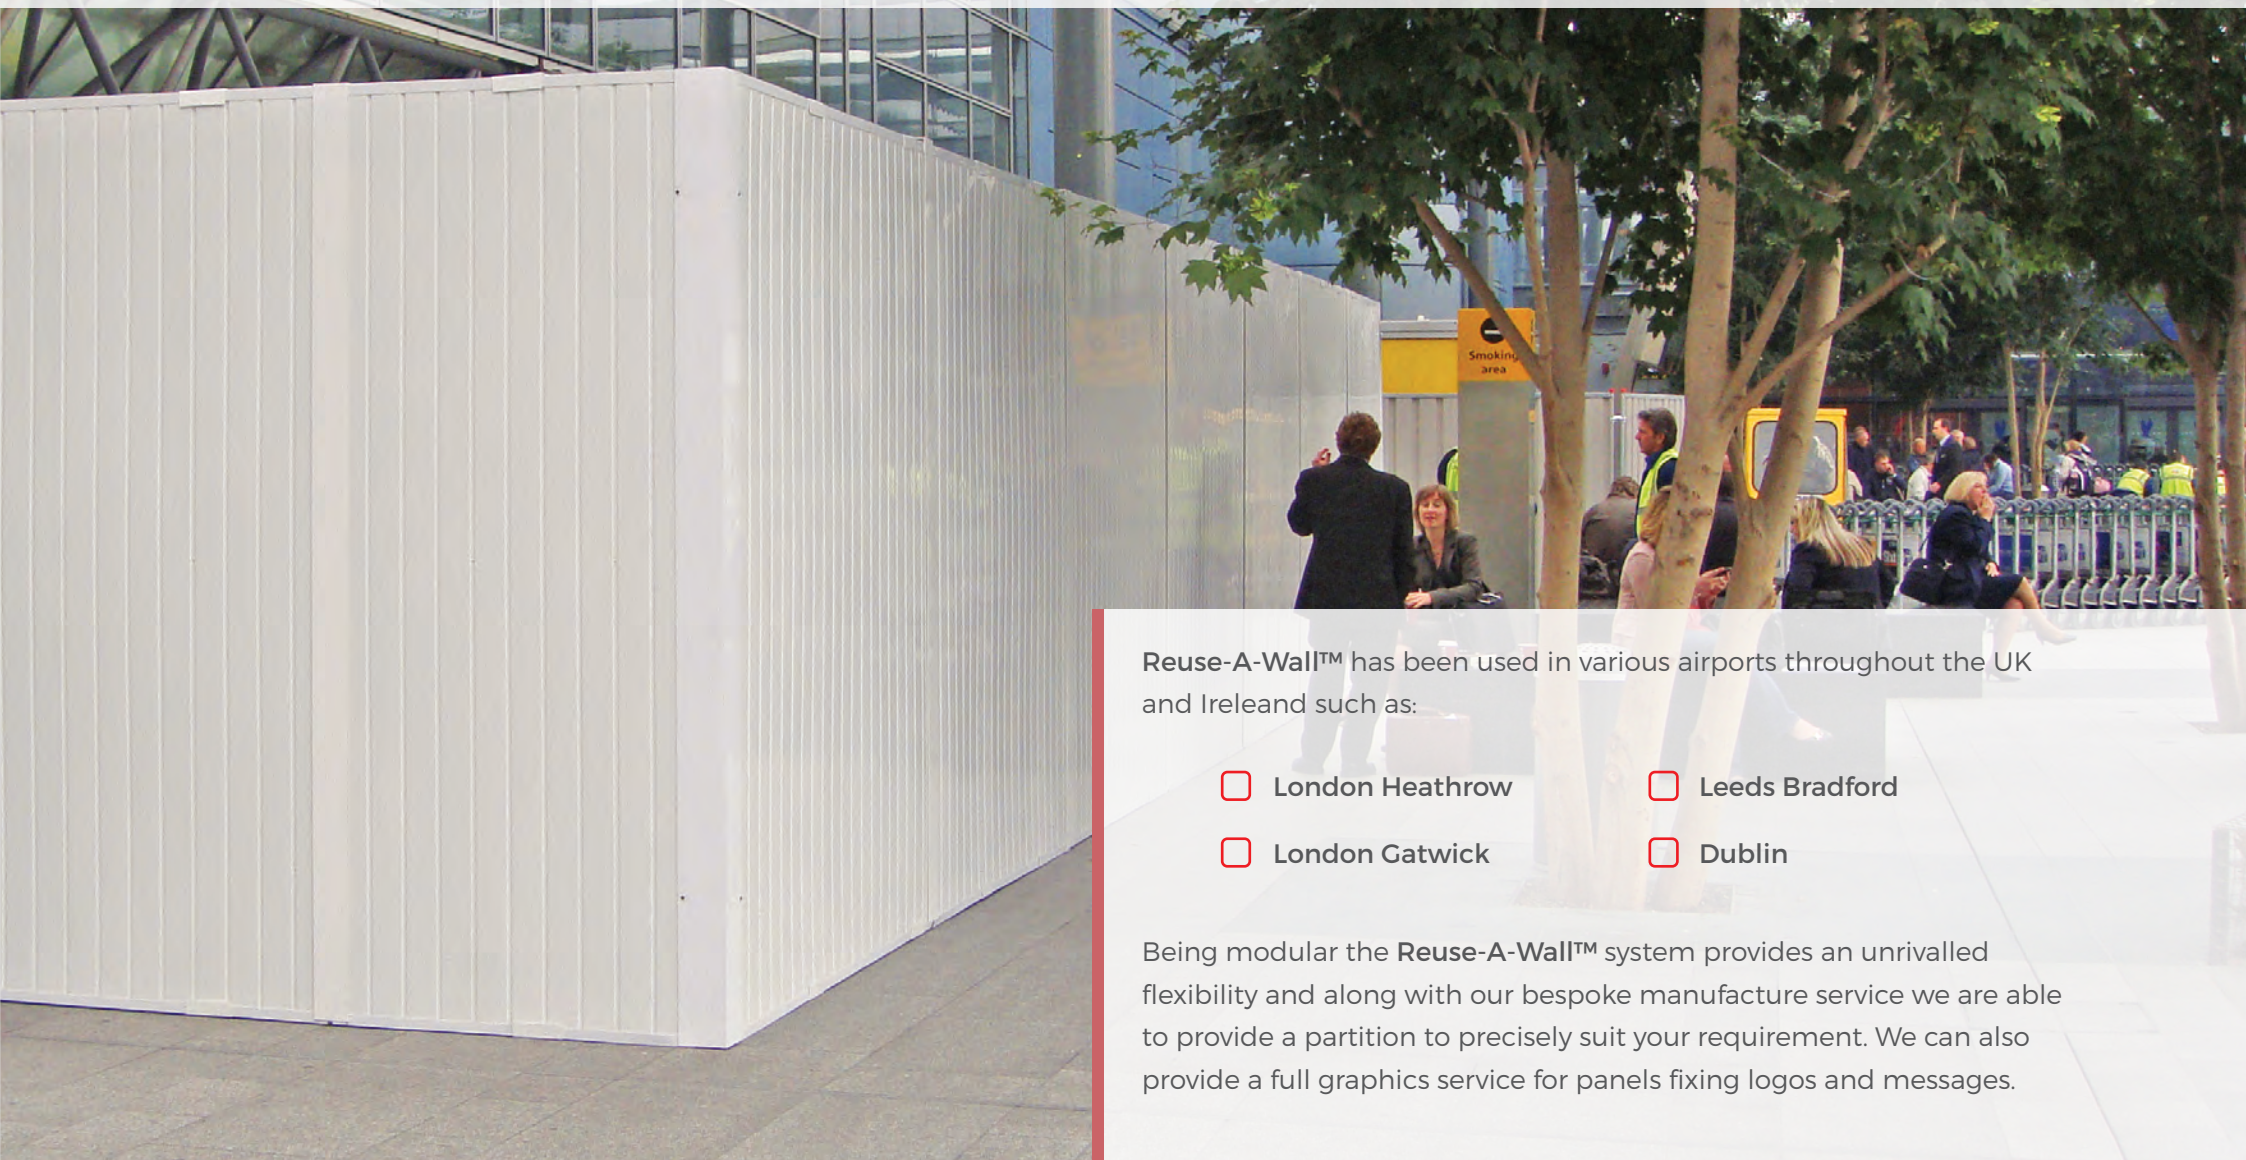

Reuse-A-Wall™ have supplied their standard modular system along with bespoke fire-rated hoarding (class 1 and class 0) to shopping centres across the UK, including:

- ☐ Leeds Trinity Bluewater
- ☐ Trafford Centre
- ☐ Covent Garden
- ☐ Leeds White Rose

INTERNAL HOARDING FOR AIRPORTS

Being a modular system, **Reuse-A-Wall™** provides an unrivalled flexibility and along with our bespoke manufacture service we are able to provide a partition to suit your exact requirement. Utilising our national CSCS certified staff, **Reuse-A-Wall™** provides a fast and effective installation and dismantle service for minimal disruption to customers and businesses, making our internal hoarding the ideal product for refurbishment projects in airports.

Reuse-A-Wall™ has been used in various airports throughout the UK and Ireland such as:

- | | |
|--|---|
| <input type="checkbox"/> London Heathrow | <input type="checkbox"/> Leeds Bradford |
| <input type="checkbox"/> London Gatwick | <input type="checkbox"/> Dublin |

Being modular the **Reuse-A-Wall™** system provides an unrivalled flexibility and along with our bespoke manufacture service we are able to provide a partition to precisely suit your requirement. We can also provide a full graphics service for panels fixing logos and messages.

INTERNAL HOARDING FOR TRAIN STATIONS

Manufactured from specially designed PVC profile, although immensely strong, the system is light and easy to handle. **Reuse-A-Wall™** panels are impact resistant and designed to withstand collision damage in high traffic locations including ticket halls and platform walkways. They are designed to enable fast and effective installation and dismantle, providing minimal disruption to occupied premises.

TRAIN STATIONS

Reuse-A-Wall™ is able to provide full wind and crowd calculations for Network Rail's form C completion, which has already been used at stations including:

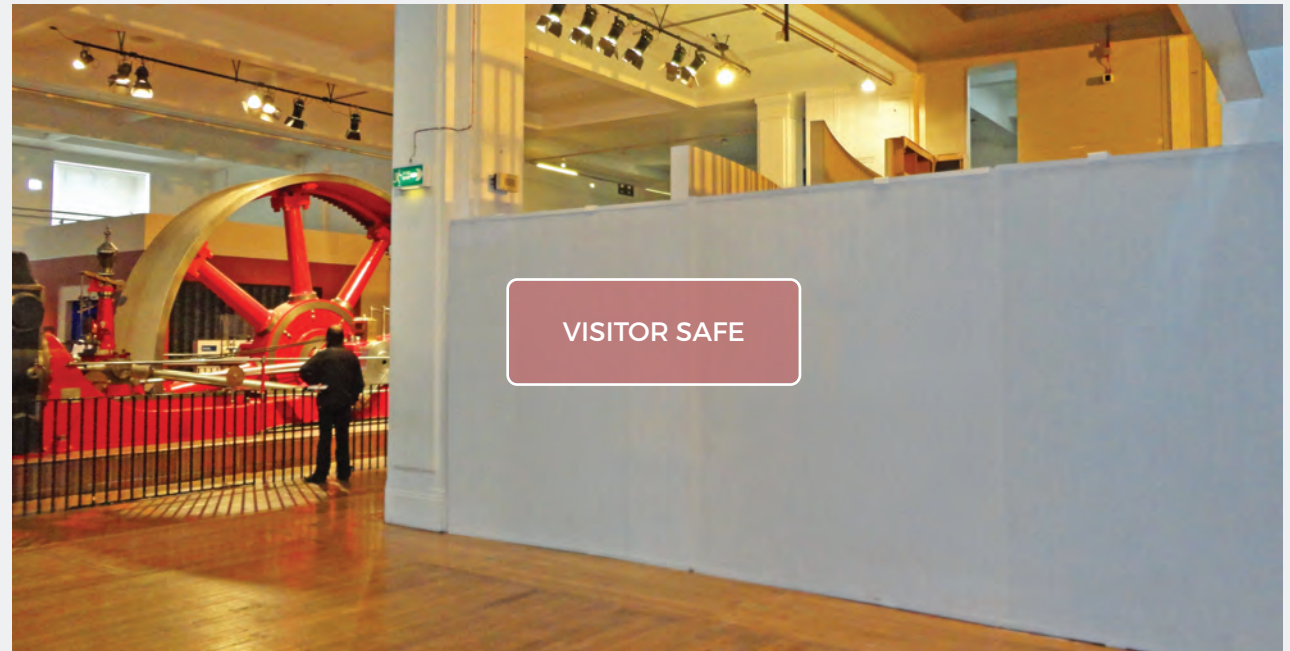

☐ London Euston

☐ Birmingham New Street

Reuse-A-Wall™ has been designed utilising only three main components to limit install / dismantle time and to provide quick and simple relocation. Exclusively available from Blok N Mesh the support system for Reuse-A-Wall™ does not protrude into the public area, **DON'T REDUCE TRIP HAZARDS, ELIMINATE THEM.**

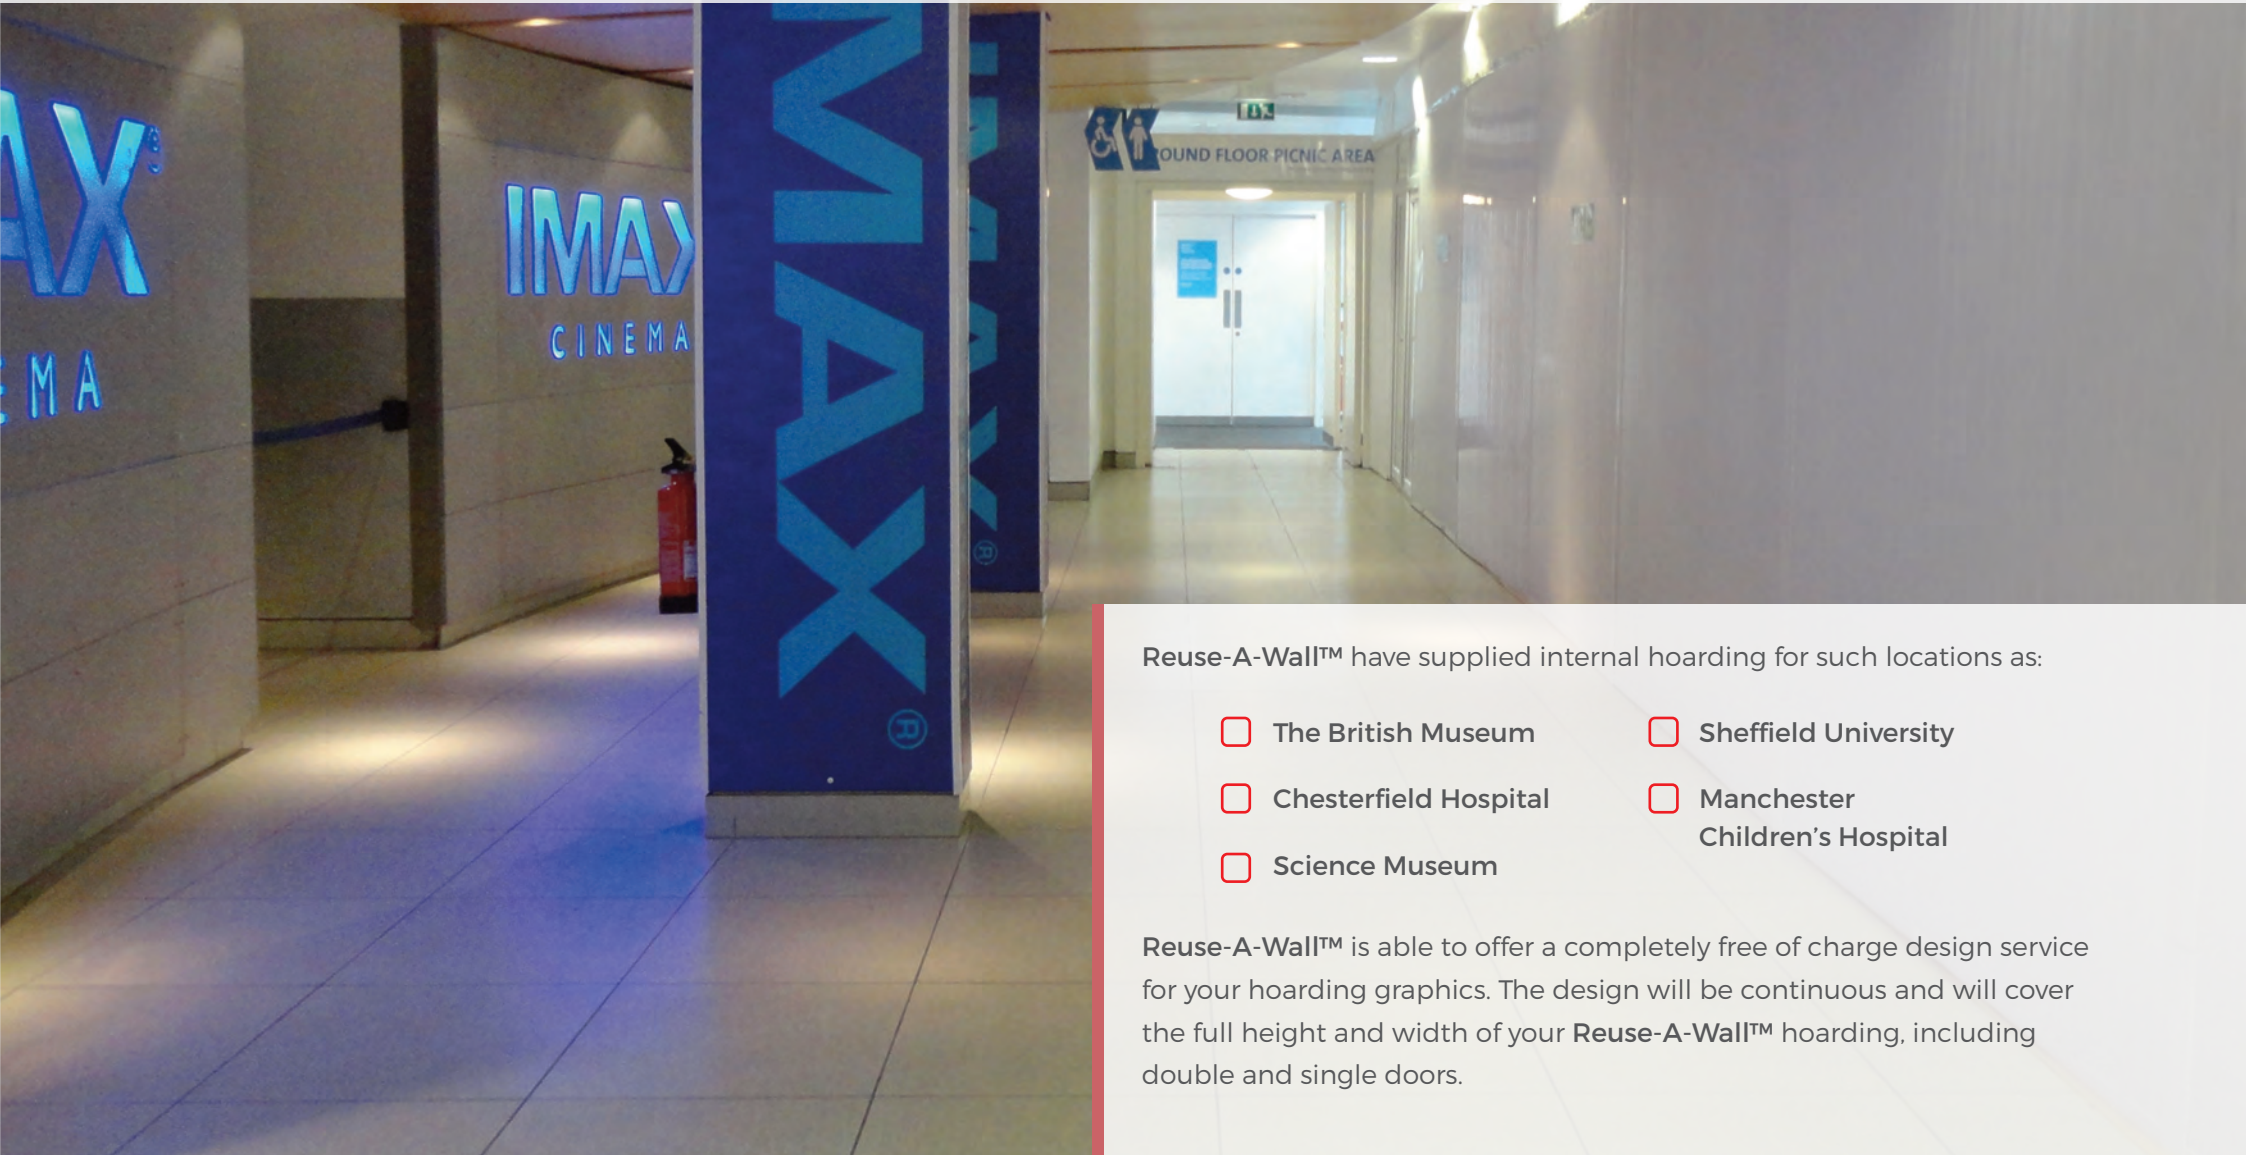

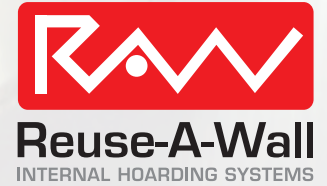

INTERNAL HOARDING FOR MUSEUMS, LIBRARIES, HOSPITALS & UNIVERSITIES

From museums and hospitals to libraries and universities, **Reuse-A-Wall™** is able to supply a safe and reliable way of hiding your building work from the general public. Exclusively available from Blok N Mesh, the support system for **Reuse-A-Wall™** does not protrude into the public area – paramount in keeping the general public safe whilst construction works are completed.

PUBLIC BUILDINGS

Reuse-A-Wall™ have supplied internal hoarding for such locations as:

- | | |
|--|---|
| <input type="checkbox"/> The British Museum | <input type="checkbox"/> Sheffield University |
| <input type="checkbox"/> Chesterfield Hospital | <input type="checkbox"/> Manchester Children's Hospital |
| <input type="checkbox"/> Science Museum | |

Reuse-A-Wall™ is able to offer a completely free of charge design service for your hoarding graphics. The design will be continuous and will cover the full height and width of your Reuse-A-Wall™ hoarding, including double and single doors.

Being a modular system **Reuse-A-Wall™** provides an unrivalled flexibility and with our bespoke manufacture service we are able to provide a partition to suit your exact requirements, with the following benefits:

✓ **ZERO TRIP™**

Exclusively available from Blok N Mesh the support system from **Reuse-A-Wall™** does not protrude into the public area.

✓ **NO WORKING FROM HEIGHT**

The basic system is installed from the surface and requires no working from height.

✓ **SAFE HANDLING**

Manufactured from specially designed PVC profiles, although immensely strong the system is light and easy to handle.

✓ **FIRE RETARDANT**

Reuse-A-Wall™ panels are fire retardant to class 1 and class 0.

FIRE STOP HOARDING

Reuse-A-Wall™ Fire Stop panels have a mineral fibre core and due to its superior fire ratings and non-combustibility, is especially suitable for high risk locations such as airports. Fire Stop will give you either a 30 minute or 60 minute fire barrier.

FIRE RATED HOARDING TUNNEL

Fire Rated Hoarding Tunnels provide safe access routes for pedestrian on sites where large scale renovation work is taking place with a chance of falling objects. The modular PVC system will guide the general public safely from one destination to another, whilst protecting them from on-site hazards and shielding the works from public view.

REUSABLE HOARDING SOLUTIONS

FULL HEIGHT HOARDING MODULAR SYSTEM

Reuse-A-Wall™ Modular system provides unrivalled flexibility and along with our bespoke manufacture service we are able to provide a partition to suit your exact particular requirement. The system is easily cleaned, food safe and an anti bacterial version which is ideal for use in Hospitals is also available.

LOW LEVEL HOARDING PEDESTRIAN BARRIER

Reuse-A-Wall™ Pedestrian Barriers have been designed to give you a fast, effective and attractive barrier system to guide foot traffic around ongoing building works. The panels are impact resistant designed to withhold collision damage from pedestrians, trolleys, etc.

EXTERNAL HOARDING

BLOCKADE™

Blockade™ Hoarding provides an attractive and cost-effective temporary hoarding. Unlike timber, the system components can all be reused.

The **Blockade™** UPVC Panel is flat-faced with UPVC infill made from 100% recycled plastic. Size: 2m x 2.15m with galvanised steel frame.

FORTRESS™

Fortress™ is our premier steel hoarding system designed to provide superb corporate image, high security and excellent value through multiple re-use.

Fortress™ Panels are heavy duty profiled steel sheets within a fully framed panel. Size: 2.4m x 2.5m. Galvanised or powder coated colour finish.

SECURE HOARD™

Network Rail approved **Secure Hoard™** has been designed for quick and easy installation by using Blok N Mesh's patent pending H Section arrangement. Flat face panels allow the use of graphics and advertising on the hoarding panels. Blok N Mesh are able to provide you site-specific wind calculations and crowd calculations for your site, which will indicate whether you require the back-stay arrangement every 1.2 meters or 2.4 metres.

GO-HOARD™

Go-Hoard™ panels provide a durable and sustainable option of external hoarding. They are made from 100% recycled PVC and are 100% recyclable.

Go-Hoard™ can be supplied in corporate colours to drive corporate image and are fire rated to BS476 Parts 6 & 7, with class 0 certification.

REUSABLE HOARDING PRODUCTS

TEMPORARY SITE CABINS

Reuse-A-Wall™ internal and external Temporary Site Cabins & Modular Buildings are made from insulated fire rated panels with a maximum width of 1.2m which allows us to build the structures inside existing rooms, basements, court yards etc. The tunnels come complete with windows and doors compatible with your requirements.

Reuse-A-Wall™ structures are designed to meet your precise requirements with bespoke layouts and specifications which can be delivered within a few weeks of your order. Our central location enables us to provide a nationwide complete delivery service & installation package.

READY RACK™ MOBILE HOARDING

Ready Rack™ is a mobile internal hoarding system designed to give your client a merchandisable hoarding during refits and remodels. Using our 50kg ballast blocks you can secure the unit from excessive movement from the back face of the panel, whilst using the front face to utilise a variety of racking system, allowing your client to advertise their range of products.

Panels can be locked together and can be easily unlocked and moved using the integrated casters from the construction side only. Comes complete with Doors and Corners.
